OPENING DOORS SURVEY OF COLLEGE STUDENTS

Dear Student,

Thank you for taking the time to complete this confidential survey. Its goal is to gather information about the lives and opinions of college students. The survey covers three topics: your health, your relationships with other people, and your attitudes about schooling and your future.

The findings will be used to help community colleges develop better programs to help students succeed in school.

Once you are finished with the survey, please seal it in the envelope provided and place it in the locked box. Again, thank you for your time.

This study will help us to learn about your experiences over the months since Hurricanes Katrina and Rita. We will ask some questions about your experiences during the hurricanes, and how the hurricanes affected your life. After we complete those questions, you will also have the opportunity to speak more generally about your experience of these storms or the aftermath. We will ask you about your current living arrangements, employment and educational goals, and your health and well-being. We will also ask about your relationships with friends and family, and how you think and feel about your future, your community and the world in general. This interview should take about 45 minutes.

INTERVIEWER SCRIPT:

This study will help us to learn about your experiences as a current or former college student. More than 4000 participants will be asked to complete an interview as part of this project.

As you know, becoming a college student can affect your life in many ways, therefore the following survey questions will not only ask about your education, but also about your current living arrangements and employment, your relationships with friends and family, and how you think and feel about your future, your community and the world in general. We will also spend some time asking about your health and well-being.

In addition, we realize that Hurricane Katrina and the aftermath have greatly affected the people who live in New Orleans and the surrounding areas. Therefore, we will also ask you some questions about how you and those close to you may have been affected by these events.

You can refuse to answer any question at any time, but please keep in mind that all information about study participants that MDRC collects will be kept private to the extent allowed by law and will be used only for this study and related research. A certificate of confidentiality is in place for this study. This means we cannot be forced to share the information you give us to any legal authorities. Any paper information that includes your name will be kept in a locked storage area, and any computer files with your name will be protected by a password. Your name will never appear in any public document.

You may direct questions about this survey to Ms. Nancy Noedel, Project Manager at Battelle in St. Louis, at 1-800- 444-5234. If you have questions about your rights as someone taking part in the study, you may call Dr. Margaret Pennybacker at 1-877-810-9530 extension 500.

Finally, at the end of the interview, you will receive a MasterCard gift card in the amount of \$50.00 for your time. Thank you for talking with us today.

Thanks very much for answering the questions we've asked you in this interview. We realize that many of these questions have been quite personal. However, your answers will help us better understand important issues that affect people of your age. Your participation is very valuable.

Thanks for agreeing to talk with me today. If it is OK with you I am going to tape record our interview so I won't have to take notes. If at any time you want me to turn off the recorder just let me know. I am going to ask you about how your life has been affected by the effects of Hurricane Katrina, so I'm going to begin by asking about what happened to you and then I'll ask you about what your life was like in various domains before and after the hurricane. (July 28).

Note to interviewer: The main idea of the interview is to understand how the respondent's life was affected by this catastrophic event and what resources they had available to help them cope with the event and its aftermath. We are especially interested in how it interrupted their life plans and what they have done to recuperate.
